# DANIEL LI LIU

## **EDUCATION**

University of Toronto | Computer Engineering

September 2020 - April 2025

• 3.86 / 4.00 cGPA

### **EXPERIENCE**

Intel Corporation | Software Engineer (May 2023 - Currently)

- Developing a testing infrastructure for customers to use for verification of the <u>Open FPGA Stack Project</u>
- Automated the yearly interview process which reduced interview scheduling times by 10x

**University of Toronto** | *Teaching Assisstant* (January 2023 - April 2023)

 Computer Fundamentals (APS105): Introduce students to the C programming language, data types, loops, arrays, data structures, algorithms, heuristics

**UoftHacks** | Frontend Engineer (September 2022 - December 2022)

• Developed and maintained the frontend of the hackathon's website for 100+ visitors

iQua Research Group | ML Researcher (May 2022 - August 2022)

- Conducted 100+ experiments using reinforcement learning algorithms such as TD3 & A2C for machine learning models for two research papers
- Extended federated learning framework <u>Plato</u> to support reinforcement learning algorithms for clients
- Redesigned *Plato*'s loss functions, optimizers, learning schedulers, & models to use a factory design pattern

## **PUBLICATIONS**

Lethe: Interference-Based Forgetting for Continual Learning Agents in Reinforcement Learning

Salma Emara, Baochun Li, Tim Zeyl, *Daniel Li Liu (Under review)* 

**Cascade: Curriculum Federated Reinforcement Learning with Interference Avoidance** 

Salma Emara, Daniel Li Liu, Baochun Li (Under review)

# **ENGINEERING PROJECTS**

## **Reinforcement Algorithms in Federated Learning Framework Plato**

- Extended research framework Plato to support reinforcement learning for clients
- Designed a custom model to support actor and critic models used in TD3 & A2C
- Created a customized trainer for both the **TD3 & A2C** algorithm that evaluates/saves average rewards for clients and the server
- Implemented a custom algorithm that communicates between the server & clients <u>Project Links</u> (First Paragraph):

# **Mapping Application with Intelligent Trip Planning**

- Created and designed fully functional **intelligent** map, similar to google maps
- Organised large amounts of data into data structures C++ STL
- Implemented full graphics with a user-friendly interface
- Implemented an optimal algorithms for path finding
- Created smarter algorithms for path finding and travelling salesman using heuristic

## **AWARDS**

Deans List (2020-2022)

Natural Sciences and Engineering Research Council of Canada's Undergraduate Student Research Award (2022)

## **TECHNICAL SKILLS**

#### **LANGUAGES**

- C / C++ (Expert)
- Python (*Expert*)
- Java (*Prior Exp*)
- MATLAB (Prior Exp)
- JavaScript (Prior Exp)
- ARM Assembly (*Proficient*)

#### WEB DEVELOPMENT

- HTML / CSS (*Proficient*)
- Next.js (Prior Exp)

#### **SOFTWARE**

- Git
- GTK
- PyTorch

### **HARDWARE**

- Verilog
- Quartus / Modelsim
- Breadboards
- DE1-SoC Boards

## OTHER INDUSTRY KNOWLEDGE

- Artificial Intelligence
- Machine Learning
  - Reinforcement Learning
  - Continual Learning
  - Curriculum Learning
